

Jumin Shin

Los Angeles, CA | (213) 556-5439 | juminshi@usc.edu | [linkedin.com/in/juminshin](https://www.linkedin.com/in/juminshin) | Portfolio: juminshin06.github.io

EDUCATION

University of Southern California

M.S. in Integrated Design, Business and Technology, Iovine and Young Academy

Hongik University (Double Degree)

BFA in School of Design Convergence · B.Eng. in Game Software

Technical University of Berlin

Exchange Student: Summer University, Gaming for Virtual and Augmented Reality

Los Angeles, CA

Aug 2025 - May 2027

Seoul, South Korea

Mar 2019 - Aug 2024

Berlin, Germany

Jul 2022 - Aug 2022

SKILLS

AI & Prototyping: Agentic AI workflows, AI agent interfaces / human-AI interaction, Model Context Protocol (MCP), generative AI prototyping, prompt design, AI SEO / structured data (JSON-LD), rapid MVP development

Design & Research: Figma, Adobe Photoshop, Illustrator, UI/GUI design, design systems, data visualization, dashboards, interaction design, web localization, interactive animation, user interviews, survey design, usability testing, data analysis

Development & 3D: JavaScript, TypeScript (foundational), React, HTML/CSS, Python, C++, responsive & real-time web UI, frontend architecture, component-based UI, Unreal Engine, Unity PolySpatial (visionOS), Blender, FFmpeg, Git, Basecamp

WORK EXPERIENCE

Program Teaching Assistant, Summer Computer Science Program

USC Thomas Lord Department of Computer Science

Los Angeles, CA

Jul 2026

- Coached 22 students from seven Korean universities in machine learning, data science, and AI-assisted software development, then mentored final-hackathon teams on ideation, implementation, debugging, and technical troubleshooting.
- Co-developed course materials and hands-on exercises; unblocked students on programming assignments and clarified core technical concepts.

AI Research Intern

Bubba's LA

Burbank, CA

May 2026 - Jul 2026

- Designed and scaled an AI rough-cut preparation platform from a 10-video prototype to 300+ videos per automated batch, replacing manual clip-by-clip organization of footage, scripts, storyboards, voice-over files, and production notes; adopted for production use.
- Centralized real-time monitoring and control of automated timeline assembly, media handling, 3D scene creation, lighting, cameras, and animation in a single production interface.
- Led AI SEO and business-development initiatives, translating audit findings into a prioritized site-growth roadmap and integrating 11,500+ professional connections into a real-time mobile lead-prioritization dashboard.

Operations & User Experience Intern

Swim Up Hill

CA, US (Remote)

Jun 2026 - Aug 2026

- Led internal-systems and workflow optimization for a swim-education nonprofit pursuing a goal of teaching 1 million people to swim by LA28.
- Led a website team, owning end-to-end UX/UI design and HTML front-end implementation while partnering with a backend developer to consolidate program, outreach, and reporting workflows into one accessible platform.

Student Assistant

USC Iovine and Young Academy

Los Angeles, CA

Sep 2025 - Dec 2025

- Strengthened ACAD-325 (Human Technology Interaction and the User Experience) by restructuring lecture content, curating industry UI/UX case studies, and coaching students through project critiques and presentations.

Researcher & Designer Intern

Macromill Embrain

Seoul, South Korea

Nov 2023 - Jun 2024

- Contributed to mixed-method UX research with approximately 100 participants through interviews, surveys, and usability tests for Samsung Electronics, Hyundai Motor Company, and SK.
- Translated findings into personalization strategies and UI prototypes for Samsung Galaxy, camping-feature concepts for Hyundai SUVs, and an employee service platform for SK; presented outcomes at a generative AI workshop.

Web Developer Intern

Zephframe

CA, US (Remote)

Aug 2022 - Dec 2022

- Built scroll-responsive JavaScript front-end animations that increased interactivity and developed Unreal Engine virtual spaces showcasing an AI-powered modular smart-door concept.

UX Designer Intern

Cheil Worldwide (a subsidiary of Samsung)

Seoul, South Korea

Mar 2022 - Jun 2022

- Shipped localized campaign websites and promotional UI for the Samsung Galaxy Z Fold4 and Flip4 across approximately 10 international markets, including the UK, Germany, and France, adapting global launch concepts for market-specific audiences.

PROJECTS

Honda Product Visualization Sprint | American Honda × USC IYA

Feb 2026 - May 2026

- Prototyped the future of automotive design reviews for American Honda: a multi-user Apple Vision Pro experience with Logitech Muse Pen 3D annotation, leading UI for an eight-person sprint and a two-person design team through to live demos for Honda R&D.

Ethicon R&D | Johnson & Johnson MedTech × USC IYA

Jan 2026 - May 2026

- Designed the UI/UX within a nine-person cross-functional team for an AI-powered assistant that helps post-operative care teams document and predict surgical-site outcomes, incorporating input from clinicians and industry researchers.

Anaphylaxis Care | ARS Pharma × USC IYA

Jan 2026 - May 2026

- Selected for ARS Pharma's Industry Challenge Sprint; owned package, service, and UI design on a two-person team, proposing improvements to campus medication access, administration, and care delivery.

- Professional Practices Residential** | Exploring AI Innovation in Video Production with Lemonlight

Sep 2025

 - Conducted mixed-method research on AI's impact on video production during a five-day intensive with Lemonlight, then designed and pitched AI-localized Reels campaigns to industry professionals.
- Wood Chip Solid Wood Desk Tray** | Crowdfunded Product Launch

Jan 2022 - Jun 2022

 - Took a physical product from concept to market, exceeding the Tumbldug crowdfunding goal (840,000 KRW raised) and completing production, launch, and sales of the "Four Types of Wood Chip Solid Wood Desk Tray."

HACKATHONS

- HAiLY (Agentic AI for Medical Billing)** | 2nd Place, USC & Techstars Startup Weekend

Mar 2026

 - Defined the product UX, brand, and pitch for an AI agent that recovers missed hospital charges (a ~\$4.5B annual loss), grounding the business model in original clinical billing-workflow research.
- Future Gaming Service Design** | 1st Place, Newegg Gamer Zone (WD & UGREEN)

Feb 2026

 - Designed a next-generation PC café service model built on character collaborations and an immersive, dining-integrated gaming space, earning 1st Place in the educational technology workshop.
- AI Native MVP Hackathon** | 2026 USC IYA Vibe Coding, Hackathon Award Recipient

Feb 2026

 - Designed, built, and pitched a functional MVP in four hours: an automated messaging app supporting medication adherence and communication for elderly patients, earning a team award.

RESEARCH EXPERIENCE

- Research Assistant**

Seoul, South Korea

Hongik University, BE in Game Software (under Prof. Byung-Chull Bae)

Mar 2023 - Dec 2023

 - Designed and prototyped a creator-facing authoring tool for human-AI co-creation of interactive stories using generative language models; published at ICIDS 2023 and the KIISE Conference.
 - Park, J., Shin, J., Kim, G., and Bae, B.C. "Designing a Language Model-Based Authoring Tool Prototype for Interactive Storytelling." In Proceedings of ICIDS 2023.
 - Park, J., Shin, J., Kim, G., Nam, J., and Bae, B.C. "Designing a Prototype for an Interactive Story Authoring Tool Utilizing Generative Language Models." In Proceedings of the KIISE Conference, Jeju Island, South Korea, June 2023.
- Research Assistant**

Seoul, South Korea

Industry-Academia Collaboration with Hyundai Motor Company

Jan 2022 - Mar 2022

 - Proposed a mobility-based flexible learning space addressing low birth rates and remote education, fostering student-driven learning and better use of public facilities.
 - Secured industry funding with Hyundai Motor Company and Professor Kicheol Park to prototype an electric-vehicle charging port, and ran user testing using C++ and Figma.
 - Kim, H., Shin, J., Cho, S., and Park, K. "A Study on the Design of Exterior Doors and Indicators for Improved Usability of Electric Vehicle Charging Ports." In Proceedings of the KSDS Conference, Sejong, South Korea, October 2023.
- Researcher & Interaction Designer**

Seoul, South Korea

Sing In Sign | Published Interactive Music Interface

Feb 2022

 - Co-designed an interactive music-expression interface for children with hearing impairments; co-authored "Sing In Sign," published in the Proceedings of the HCI Korea Conference.
- Research Assistant**

Remote

Industry-Academia Collaboration with Samsung Electronics

Dec 2020 - Mar 2021

 - Researched podcast formats and designed a GUI in collaboration with Samsung Electronics' MX Business Division and Hongik University's College of Design and Arts.
 - Mapped the mobile gaming landscape, identified key differentiators, and built surveys from user interviews; secured research funding with Professor Min-Jeong Kang to compensate usability-testing participants, generating actionable insights for the project.

AWARDS & GRANTS

- Lotte Scholarship Foundation

May 2023
- Hongik University Internal Scholarship

Mar 2019 - Aug 2023
- Korea Student Aid Foundation Arts and Sports Vision Scholarship

Mar 2021 - Dec 2022
